

Archaeological Field School

Dates: May 30 – July 8, 2017

Faculty: Dr. Robert Jeske

Enrollment Information:
ANTHRO 567 - 6.0 credits

Location:
Fort Atkinson, Wisconsin

Approximate Tuition/Fees:

Undergraduate

WI Resident \$2,022

Non-Resident \$4,566

Minnesota \$2,974

Midwest Exchange \$3,064

Graduate

WI Resident \$2,596

Non-Resident \$5,855

Minnesota \$3,961

\$220 equipment fee

Prerequisite:

Instructor consent, ANTHRO 103
(Intro. Archaeology) or equivalent

Program in Midwestern Archaeology

The UWM Archaeological Field School will return to the Crescent Bay Hunt Club for our 10th excavation season, and to Koshkonong Creek Village for our 5th year of excavation. In addition to our excavations, we will conduct survey at several nearby sites along the northwest shore of Lake Koshkonong. We continue our long-term research into Oneota agricultural village life in southern Wisconsin. The sites were occupied circa A.D. 1050-1400 and have yielded evidence for settled agricultural life including wigwam-style houses, longhouses, dozens of food preparation and food storage facilities, and tremendous amounts of Oneota-style ceramics, stone tools, and copper implements. We will focus our research this year on the spatial relationship of the houses, pit features, and activity areas within the Crescent Bay Hunt Club and Koshkonong Creek Village sites. Methods and techniques that students will learn include survey of cultivated fields, shovel testing, test unit excavation, and feature excavation.

Housing/Transportation

Primitive camping with showers and kitchen facilities is available on site at no cost. The site is located approximately 1.5 hours from UWM and limited daily transportation to and from campus is available.
