Course
SOC 3720-01
June 19-June 30, 2017**

The 2017 Saint Louis University field school will take place at the prehistoric chiefdom of Cahokia, located in the St. Louis metropolitan area near present-day Collinsville, Illinois, and is under the direction of Dr. Mary Vermilion mvermili@slu.edu.

Field school students will receive training in various aspects of archaeological fieldwork, including site survey and mapping, excavation and recording techniques, artifact identification, analysis, processing, and inventory.

The number of students is limited to ensure individual instruction and hands-on experience. Students must provide their own food and transportation to and from the site.

This is a four (4) credit course and is open to Saint Louis University undergraduate students as well as visiting students from other institutions. No previous field experience is necessary. We meet Monday through Friday, 7:30 AM-3:30 PM.

In addition to tuition, there is a \$120 equipment fee and a \$100 deposit. The deposit is refundable upon completion of the course. Please contact Dr. Vermilion (314 977-2896) or Ashlee Dorsee (314 977-2000) to register.

This is a two (2) credit course that emphasizes the scientific methods and procedures used by archaeologists to investigate, reconstruct, interpret, preserve, and learn from artifacts, features, and ecofacts. Students learn to process, inventory, analyze and interpret the archaeological record within both regional and site contexts.

The course will be taught at Saint Louis University in the Morrissey Hall Archaeology Lab and meets Monday through Friday.

Please contact Dr. Vermilion (314 977-2896) or Ashlee Dorsee (314 977-2000) to register.

**STUDENTS MAY REGISTER FOR
EITHER OR BOTH COURSES**
